Jesuloba Isaac

UI UX Designer/Web Developer/Mobile App developer

Lagos, Nigeria

+2349158723702

be.net/jesulobaisaac

Web Application Development:

Led the development of web applications tailored to meet the specific needs of the FMCG distribution sector.
Collaborated with cross-functional teams to gather requirements and translate them into scalable and user-friendly web solutions.
E-commerce Integration:

Implemented e-commerce functionalities to enhance online ordering processes for both B2B and B2C customers.
Integrated payment gateways and optimized checkout processes to improve the overall user experience.
Data Management and Analysis:

Developed data management tools to streamline inventory tracking, order processing, and supply chain management.
Implemented data analysis features to derive actionable insights, aiding in decision-making processes.
Mobile Responsiveness:

Ensured the responsiveness of web applications across various devices, enhancing accessibility for users on smartphones and tablets.
Security Measures:

Implemented robust security measures to safeguard sensitive customer and business data.
Conducted regular security audits and implemented updates to mitigate potential vulnerabilities.
Collaboration and Communication:

Worked closely with internal teams, including logistics, sales, and marketing, to align web development initiatives with overall business goals.
Communicated technical concepts effectively to non-technical stakeholders, fostering collaboration and understanding.
